CONDITIONAL UNTIL A VENDOR PROOF EXISTS

Halo-lit signage

Fabricated letters and mark from the vector, lit from behind.

GEOMETRY

Never simplified for a method. If the method cannot hold three distinct threads at the requested size, the answer is a larger size, recorded here after the proof, never a simplified mark.

ARTWORK TO SUPPLY

Outlined one-colour vector (SVG and PDF) from the logo system: corporate: automations.mark.solid-gold.navy / solid-navy.ivory / solid-ivory.navy (one-colour); corporate foil master for colour intent; saffron-designs: designs.mark.solid-saffron.ivory / solid-ivory.ink / solid-gold.ink / solid-ink.ivory; foil and thread masters for colour intent; saffron-obsidian: systems.mark.solid-gold.ground / solid-ink.ground / solid-ground.ink; foil master for colour intent

SIZE FLOOR

UNKNOWN until proofed. Formula: H_min = f_min / 0.048, where f_min is the smallest line and gap this vendor holds on this substrate, and H is the mark height. The thinnest thread and the narrowest gap in the counting band are each 4.8% of H.

COLOUR REFERENCES

Token hex values only (corporate gold #C9A96E, navy #16223A; Designs saffron #A5320F; Obsidian gold #EBCE7C). Pantone, foil, thread and vinyl numbers: UNKNOWN until a measured swatch or vendor drawdown.

VENDOR PROOF MUST RECORD

return depth, stand-off, LED colour temperature; the measured f_min; photographs of the proof at floor, 2x floor and display size.

CLEAR SPACE

2T on every side (0.1925 H). Status: SANCTIONED (D-2).

APPROVAL

Aladdin approves the proof. Contacting a vendor is sending to a third party and needs his explicit go.
